

Alex Wright

Technical Consultant | Full-Stack Developer | Client Solutions Expert

831-331-3051 | alex.gr.wright@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

As a Technical Consultant, I specialize in bridging the gap between technology and business, helping organizations integrate, optimize, and scale software solutions. With a strong foundation in software development and client-facing consulting, I excel at translating complex technical challenges into strategic, actionable solutions. My career began at Google as a Program Manager, where I led cross-functional initiatives, optimized workflows, and delivered scalable solutions. My experience in real estate further honed my ability to navigate high-stakes decision-making with data-driven insights. Now, as a software professional, I focus on aligning technology with business objectives—whether through API integrations, SaaS platform optimization, or delivering compelling technical demonstrations. I thrive at the intersection of technology and strategy, ensuring that solutions are not only technically sound but also drive business impact.
